## Mollitiam AI Auditor | Automated IT Disaster Recovery Audits

---

### Overview:

Mollitiam AI is one of the only U.S.-based SaaS platforms dedicated to automating IT disaster recovery audits with artificial Intelligence (AI). Built for compliance teams, our solution streamlines audit workflows, enhances transparency, and supports SOC 2, PCI DSS, GDPR, and CSA STAR readiness.

### Why It Matters:

Disaster recovery audits are essential for verifying your organization's ability to restore systems and data after outages, cyberattacks, or infrastructure failures. Regulatory frameworks increasingly demand proof of recovery readiness. Mollitiam AI helps you automate this process—reducing manual effort, improving accuracy, and accelerating compliance timelines.

### Key Features:

- ✓ Fully automated AI auditing with a knowledgebase tailored to IT recovery elements
- ✓ Fast reporting with identified and actionable areas for improvement
- ✓ Secure cloud architecture with third-party infrastructure certifications
- ✓ Built-in support for SOC 2, PCI DSS, GDPR, CSA STAR
- ✓ Designed for enterprise compliance teams and MSPs

### Use Cases:

- Enterprise compliance teams seeking audit automation

- MSPs offering disaster recovery assurance to clients
- Internal audit departments preparing for SOC 2 or PCI assessments
- CTOs and CISOs needing transparent recovery documentation

### **Security & Trust:**

Mollitiam AI is built on secure cloud infrastructure with third-party certifications.
